PROFESSIONAL SUMMARY

•AWS/DevOps transition candidate with 4 years of non-IT work experience and hands-on project experience in AWS and DevOps technologies. Practical experience in building CI/CD pipelines, containerizing applications, deploying applications on AWS EC2, and automating infrastructure and configuration. Familiar with AWS services including EC2, S3, IAM, VPC, RDS, and CloudWatch, along with Jenkins, Git/GitHub, Docker, Terraform, Ansible, Linux, Nginx, Maven, and Shell Scripting. Seeking an entry-level/junior AWS/DevOps opportunity to apply project-based technical skills in a professional environment.

SKILLS

Amazon Web Service (AWS)

(EC2 , S3 , VPC , EFS , EBS , REDSHIFT , RDS , CLOUD FRONT,CLOUD WATCHES ,
CI/CD , IAM , ROUTE53 , CLOUD FORMATION , MIGRATION)

DevOps

(JENKINS , DOCKER , GIT/GITHUB , ANSIBLE , TERRAFORM ,[CONTINUE
INTEGRATION - CONTINUE DEPLOYMENT CI/CD])

EDUCATION

Bachelor of Computer Application BCA 75%

Madras University Tagore College of Arts an Science - Chromepet Completed from 2017 to 2020.

HSC 75.0%

Bharathiyar Matriculation Higher Secondary School - Guduvanchery Completed from 2016 to 2017.

SSLC 76.8%

Bharathiyar Matriculation Higher Secondary School - Guduvanchery Completed from 2014 to 2015.

WORK EXPERIENCE

Process Executive Data

December 2020 to Jun 2021

- Cognizant Software Solution pvt Limited

Collected, reviewed, and processed data from multiple sources while ensuring accuracy and completeness.

Skilled in reviewing patient insurance coverage and verifying medical and pharmacy benefits for prescribed drugs on behalf of healthcare providers. Experienced in coordinating accurate benefit information, identifying coverage requirements, and supporting providers to ensure a smooth patient access process. Strong attention to detail, communication, data accuracy, and process compliance.

PROJECT

Automated CI/CD Pipeline for Cloud Application Deployment

Designed and implemented an automated CI/CD pipeline for deploying a web application on AWS cloud infrastructure. Integrated GitHub with Jenkins to automate source code checkout, build, testing, Docker image creation, and deployment. Used Docker for containerization and AWS EC2 for hosting the application. Implemented Infrastructure as Code using Terraform and automated server configuration using Ansible. Configured monitoring and logging using AWS CloudWatch to ensure application availability and performance. The pipeline reduced manual deployment effort and enabled faster, consistent, and reliable software releases.

Technologies Used : Cloud AWS EC2, S3, IAM, VPC, CloudWatchVersion ControlGit, GitHub CI/CD Jenkins Containerization Docker Infrastructure as Code Terraform Configuration Management Ansible Web Server NginxOS Linux (Ubuntu/Amazon Linux) Build Tool Maven Monitoring AWS CloudWatch Scripting Shell Script
